National Institute of Technology Delhi
Bachelor of Technology (CGPA: 8.44)

2020-24

EXPERIENCE

ThoughtSpot | Member of Technical Staff 3 | Python, Golang, Java Aug '25 - Present | Hyderabad

- Architected a **distributed, multi-tenant provisioning engine** using **Python, FastAPI, SQLAlchemy, Alembic**, and **Terraform on AWS** (EC2, S3) to automate isolated environment deployments across **3 global regions** (USA, Europe, Oceania), reducing onboarding deployment timeline from **weeks to under 2 hours** for **3k+ enterprise users**.
- Created **SpotterCode**, a custom **MCP server** handling **200 concurrent requests** via an **async, multi-worker** and horizontally scalable architecture and caching across 3 dedicated agents (embed, docs, API); enabling **5k+ enterprise users** to embed BI websites via natural language, **increasing embed adoption by 20%**.
- Engineered integrations for ThoughtSpot web plugins across **Google Slides, Sheets, Microsoft Excel, and PowerPoint**, enabling embedded analytics for **2k+ enterprise users**.
- Collaborated in building a **Salesforce LWC plugin** to embed ThoughtSpot dashboards directly within Salesforce CRM, reaching **300+ enterprise Salesforce admins**, a high-value segment at the intersection of two enterprise platforms.
- Prototyped **Spotbuild**, an **AI-powered prompt-to-BI system** that auto-generates Liveboard answers and worksheets, pioneering an approach later adopted by the product's native AI features.

ThoughtSpot | Member of Technical Staff 2 | Java, Golang, React, Typescript, GraphQL Jul '24 - Jul '25 | Hyderabad

- Achieved a **90% reduction in homepage load time** by migrating the internal Cassandra impressions database to a new schema, replacing per-view lookups with a unified table storing total views per user.
- Introduced **org awareness** to the trending table of **Cassandra** database by creating a new table with altered schema, allowing each isolated org in the instance to have separate trending objects.
- Executed team-led **zero downtime data migration** of **50M+** rows across clusters in **Cassandra** database by implementing a background script that safely transferred data and seamlessly switched over to the new schema.
- Redesigned the user onboarding to highlight **AI-powered Spotter**, guiding users through creating connections, importing data, and asking questions via natural language, resulting in improved feature adoption by 30%.
- Addressed a **security vulnerability** in the share API by implementing a Redis-based rate limiter after penetration testing exposed a missing rate limit, effectively controlling API request rates and mitigating abuse risks.
- **Diagnosed and patched** a Mixpanel overtracking issue ahead of a renewal, **reducing test event volume by 98.5% (20M to 300K)** and **saving \$30K**.
- Added frontend support for **monitor alerts in Slack**, enabling users to receive data updates directly in Slack without opening the BI tool, increasing notification click rate by 20%.

ThoughtSpot | Software Engineering Intern | React, Typescript, Playwright, Jest Jun - Jul '23 | Jan - Jun '24 | Hyderabad

- Migrated schema viewer from Angular to React by building 15+ React components and integrating GraphQL APIs, improving maintainability and reducing page load latency. Also rectified design issues in the legacy UI during migration.
- Implemented **filter and sort features** for worksheet tables and columns, collaborating with backend teams to extend APIs with **tags, authors, and database metadata**.
- Streamlined **50+ accessibility improvements** across the product's website using **React**.

PROJECT HIGHLIGHTS

Golang News Reader (UI + Terminal) [Code]

- Developed a full-stack RSS reader with a **Go backend**, **Preact frontend**, and interactive **terminal/web UI**.
- Implemented a **SQLite caching layer** and **REST API** in Go for feed management across **100+ feeds**.
- Supports full article extraction, TTS, podcast media enclosure, feed grouping, and persistent read/unread tracking.

Real Time Chatroom Application [Code+Screenshots]

- Built a multi-platform real-time chat system using **Next.js**, **Clerk authentication**, and **AWS S3 storage**.
- Supported **2GB media uploads** and real-time messaging with **Socket.IO**, deployed to **50+ test users**.

SKILLS

- **Languages & Frameworks:** TypeScript, Java, Golang, Python, C++, SQL, GraphQL, React, Next.js, Node.js, Flask
- **Tools & Cloud:** AWS (EC2, S3, Lambda, CloudWatch), GCP, Terraform, Docker, Firebase, Git, Jest, Playwright

ACHIEVEMENTS

- Solved **600+** Data Structures and Algorithm problems on **Leetcode** [Link], rated **1764** in contests.
- Achieved a highest rating of **1736 (Expert)** in **Codeforces** [Link].
- Published ICIC3S paper on **Plant Disease Identification Models** [IEEE Xplore].
