EXPERIENCE

ThoughtSpot | Member of Technical Staff 3 | Java, Golang, React, Typescript, GraphQL Aug '25 - Present | Hyderabad

- Engineered integrations for ThoughtSpot web plugins across **Google Slides, Sheets, Microsoft Excel, and PowerPoint**, enabling embedded analytics for **2k+ enterprise users**.
- Collaborated in building a **Salesforce LWC plugin** to embed **ThoughtSpot dashboards and Liveboards** directly within Salesforce, enabling contextual analytics inside CRM workflows.
- Built **Spotbuild**, an **AI-powered content generation system** that auto-generates **Liveboard answers and worksheets** from user prompts, enabling prospects to quickly assess ThoughtSpot's analytical capabilities.
- Created **SpotterCode**, a MCP server to help user embed BI websites faster using natural language, also providing **relevant documentation** for deeper understanding.

ThoughtSpot | Member of Technical Staff 2 | Java, Golang, React, Typescript, GraphQL Jul '24 - Jul '25 | Hyderabad

- Achieved a **90% reduction in homepage load time** by migrating the internal Cassandra impressions database to a new schema, replacing per-view lookups with a unified table storing total views per user.
- Introduced **org awareness** to the trending table of **Cassandra** database by creating a new table with altered schema, allowing each isolated org in the instance to have separate trending objects.
- Executed team-led **zero downtime data migration** of **50M+** rows across clusters in **Cassandra** database by implementing a background script that safely transferred data and seamlessly switched over to the new schema.
- Redesigned the user onboarding to highlight **AI-powered Spotter**, guiding users through creating connections, importing data, and asking questions via natural language, resulting in improved feature adoption by 30%.
- Addressed a **security vulnerability** in the share API by implementing a Redis-based rate limiter after penetration testing exposed a missing rate limit, effectively controlling API request rates and mitigating abuse risks.
- Diagnosed and patched** a Mixpanel overtracking issue ahead of a renewal, **reducing test event volume by 98.5% (20M to 300K)** and **saving \$30K**.
- Added frontend support for **monitor alerts in Slack**, enabling users to receive data updates directly in Slack without opening the BI tool, increasing notification click rate by 20%.

ThoughtSpot | Software Engineering Intern | React, Typescript, Playwright, Jest Jun - Jul '23 | Jan - Jun '24 | Hyderabad

- Migrated schema viewer from Angular to React by building 15+ React components and integrating GraphQL APIs, improving maintainability and reducing page load latency. Also rectified design issues in the legacy UI during migration.
- Implemented **filter and sort features** for worksheet tables and columns, collaborating with backend teams to extend APIs with **tags, authors, and database metadata**.
- Rolled out Knowledge Cards that show users information about a selected table including database, schema, and author.
- Streamlined **50+ accessibility improvements** across the product's website using **React**.

PROJECT HIGHLIGHTS

Golang News Reader (UI + Terminal) [Code]

- Developed a full-stack RSS reader with a **Go backend**, **Preact frontend**, and an interactive **Terminal User Interface (TUI)**.
- Implemented a **SQLite-based caching system** and a **RESTful API** in Go for efficient feed management and content delivery.
- Supports full article content extraction, TTS, and integrated podcast media enclosure across **100+ feeds**.
- Designed a **responsive UI** (web + terminal) with keyboard/mouse navigation, feed grouping, and persistent read/unread tracking.

Real Time Chatroom Application [Code+Screenshots]

- Built a multi-platform real-time chat system using **Next.js**, **Clerk authentication**, and **AWS S3 storage**.
- Supported **2GB media uploads** and enabled real-time messaging with **Socket.IO** for real-time bidirectional communication.
- Deployed a working demo used by **50+ test users**.

SKILLS

- Core:** Java, Golang, TypeScript, React, SQL, GraphQL
- Proficient:** Python, C++, Node.js, Next.js, Flask
- Tools:** Git, Docker, Firebase, AWS (S3, EC2), Jest, Playwright

ACHIEVEMENTS

- Solved **600+** Data Structures and Algorithm problems on **Leetcode** [Link], rated **1764** in contests.
- Achieved a highest rating of **1736 (Expert)** in **Codeforces** [Link].
- Published paper **Study and Analysis of Plant Disease Identification Models** for ICIC3S Conference, available on [IEEE Xplore] DOI: 10.1109/ICIC3S61846.2024.10603350.
